185.	HCV RNA PCR Quantitative kit Specification Devices Required for PCR HCV Extractor, Amplification and Detection HCV RNA extraction , amplification and Detection with following specifications: 1. HCV RNA Extractor 2. PCR Machine for Amplification and Detection 3. Computer System with laser jet printer. Technical Requirement Following Detail are Required. 1. Both Qualitative and Quantitative Test for HCV (Extraction, Amplification and Detection could be performed. 2. At least 4 fluorescence measuring channels with excitation/Detection wave length should be 470/520,530/570,590/630 and 630/670. 3. CCD Camera for the Detection of Fluorescence 4. Melting curve Analysis 5. Single Nucleotide Polymorphism 6. Gene Expression Analysis 7. LED as a light source required with minimum life time about 10000 hours. 8. Data can be easily viewed and saved the data by using computer system. Note: These all devices should have open system that could be easily open on other reagent and consumable. <u>RNA Extraction:</u> 1. Magnetic particles separation technology. 2. Throughput >24 samples/ run with integrated micro processor. <u>RNA Amplification and Detection:</u> 1. Microplate 96 x 0.2 ml for Real Time PCR. 2. Both Amplification and detection without operator intervention. 3. The amplification module to be run in Real Time PCR machine having standards along with quantitation data. The signals of the internal control as well as the samples could be detected on either of the FAM, Cy3, and Texas Red and Cy5 channels. (CCD Camera). 4. Kits (both extraction and amplification) should be intended for in vitro Diagnostic (IVD) use and quality certified. 5. Data can be viewed and analyzed by using computer but amplification program is being executed. 6. Amplification and detection devices are not limited for used with specific reagent or consumable. 7. Data (result analysis), easily integrated in any laboratory information system (LIS) and devices saved all the standard graphic results. <u>Note:</u> 1. Only European and American based products will be entertained (CE/FDA Approved). 2. Final Bidder of the tender will provide all consumables and accessories. 3. Final Bidder of the tender will place fully automated DNA/RNA Extractor in the PCR Lab free of cost.	30 Kit	Kit
